

Ruby - Feature #19303

Resolv::IPv4::Regex variant without anchors

01/03/2023 12:34 PM - henk (Hendrik Jäger)

Status:Open Priority:Normal Assignee: Target version:	
Description <pre>require 'resolv' p "match this IP: 10.0.0.1"[/match this IP: ({Resolv::IPv4::Regex})/, 1]</pre> This returns 'nil' because Resolv::IPv4::Regex is anchored with \A and \z. I would like to have a variant of Resolv::IPv4::Regex available that is not anchored so that code would return '10.0.0.1'.
