

Ruby - Feature #5029

accept multiple args in Kernel#warn(), like puts()

07/15/2011 05:34 AM - sunaku (Suraj Kurapati)

Status:	Closed	
Priority:	Normal	
Assignee:		
Target version:		
Description		
Hello,		
Please make Kernel#warn() like Kernel#puts():		
• Accept multiple arguments. • Print them separated by newline.		
This will allow me to warn exceptions easily:		
begin		
...		
rescue => error		
warn error.inspect, error.backtrace		
end		
Instead of the current way, of having to write:		
begin		
...		
rescue => error		
warn error.inspect		
warn error.backtrace.join("\n")		
end		
Thanks for your consideration.

History

#1 - 07/17/2011 11:06 AM - boredomist (Erik Price)

- File 0001-Changed-rb_warn_m-to-accept-variable-arguments.patch added

I implemented this feature request in the attached patch if there's any interest in the changed behavior of Kernel#warn().

#2 - 07/17/2011 03:30 PM - nobu (Nobuyoshi Nakada)

- Status changed from Open to Closed

- % Done changed from 0 to 100

This issue was solved with changeset r32568.
Suraj, thank you for reporting this issue.
Your contribution to Ruby is greatly appreciated.
May Ruby be with you.
