

Ruby - Bug #20087

Uninitialized instance variable warning - obsolete documentation

12/26/2023 03:12 PM - semaperepelitsa (Simon Perepelitsa)

Status:	Closed	Backport: 3.0: UNKNOWN, 3.1: UNKNOWN, 3.2: UNKNOWN, 3.3: UNKNOWN
Priority:	Normal	
Assignee:		
Target version:		
ruby -v:		
Description		
This warning got removed from Ruby 3.0: https://bugs.ruby-lang.org/issues/17055		
But the documentation (ruby/doc/syntax/assignment.rdoc@master) still says:		
An uninitialized instance variable has a value of +nil+. If you run Ruby with warnings enabled, you will get a warning when accessing an uninitialized instance variable.
