

Ruby - Feature #9042

Remove "f" suffix in favor of VM optimization of "literal".freeze

10/22/2013 09:14 PM - headius (Charles Nutter)

Status:	Closed	
Priority:	Normal	
Assignee:		
Target version:	2.1.0	
Description		
The "f" suffix has been added to Ruby trunk to allow creating pre-frozen literal strings. However, #8992 provides a way the VM could simply optimize #freeze called on a literal string in the same way. If #8992 is accepted, the backward-incompatible "f" syntax should be removed.
